

Mobile App Download

The Mobile App Download module gives your members a quick and convenient way to download your union's mobile app directly from your website. When properly configured, the module displays Download on the App Store and Android App on Google Play buttons.

If the app store links haven't been set up yet, the module will display an error message prompting you to add them before it will work.

Download Our App!

ERROR: Go to Admin Area and Enter your Apple Store and Google Play Store links in the site settings area. Your site must have a mobile app to use this module.

It's worth noting that this module requires your union to have a mobile app to begin with. If your union doesn't have one yet, UnionActive offers custom union-made iPhone and Android apps that integrate directly with your website.

These apps are fully branded to your organization and come loaded with features including push notifications, member logins, shift trades, online voting, photo galleries, a calendar of events, and much more.

To get started, you can fill out the request form at unionactive.com or call 1-888-248-5557. [Find out more here.](#)

Setting Up the Module

To add the Mobile App Download module to your homepage, navigate to Edit Main Column, select Mobile App Download from the dropdown menu, and click Add Module.

Before the module will display the download buttons, you'll need to enter your app store links in the site settings.

Go to Admin Area > Settings > Change Contact Information and scroll down to the Mobile App Settings section. Enter your Apple App Store URL and your Android App URL in the second field.

Edit Website Settings

- ▶ Change Contact Information
- ▶ Add / Remove Features
- ▶ Change Colors
